Welcome to ISBT Kumedi

About this handbook

ISBT Kumedi operates as Indore's key interstate bus terminal, under a 20-year IDA–BVG Sub-Lease-cum-Operate-Maintain-Transfer concession awarded by the Indore Development Authority (IDA) to BVG India Limited.

Working across a live, high-footfall transit facility can be demanding — this handbook exists to help our property customers (retail, F&B, advertising, parking, amenity and institutional occupants) with day-to-day property queries.

About the concession

- Concessionaire: BVG India Limited (GSTIN 23AACCB0943N1ZS)
- Authority: Indore Development Authority (IDA)
- Reference: LOA No. 2070/Technical/2026-27
- Term: 20 years, IDA–BVG Sub-Lease-cum-OMT structure
- BVG is committed to a safe, well-run terminal for passengers, occupants and the travelling public alike.

Making Every Journey Better

It is a commitment from everyone who serves passengers at ISBT Kumedi — BVG, our retail and F&B partners, transport operators, and institutional occupants — to deliver a better experience every day.

The concourse, ISBT Kumedi (as built)

Six ways we work together

Doing the right thing

Honest, transparent dealings with every occupant and partner.

Treating everyone with respect

Courteous, considerate service to passengers, occupants and colleagues alike.

Giving excellent service

Putting a great passenger and tenant experience at the heart of what we do.

Working together

One terminal team — BVG, occupants and operators solving problems jointly.

Keeping everyone safe

Never compromising on safety or security, every time.

Improving every day

Looking for ways to reduce cost, waste and friction across the terminal.

Introduction & contacting the property team

Introduction

- This handbook gives you basic information about occupying property space at ISBT Kumedi, and answers the common questions BVG's property team is asked by occupants.
- We welcome your feedback on this handbook. Contact us at [property@bvgindia.com — placeholder].

Contacting the ISBT Kumedi property team

- Your Zone/Category Manager is your day-to-day contact for compliance issues (building inspection, fire risk assessments, colleague fire training).
- Your Zone/Category Manager is also responsible for licence/lease agreements, commercial renewals and any changes to your space requirements.
- Reporting faults: contact the engineering help desk — see page 11.
- Accounts queries: contact BVG's Business Support Centre on [Placeholder number].

Zone / Category	Manager	Telephone	Email
Bus Bay Operations	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com
Retail & F&B / Food Court	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com
Advertising / OOH	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com
Parking	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com
Amenities	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com
Passport/Visa Centre (Institutional)	[Placeholder Name]	[Placeholder]	[placeholder]@bvgindia.com

Guidance notes

How to use these notes

- The contents of this handbook are valid and accurate at the date of writing; however, all pages are subject to revision.
- If you need explanation or further information on any topic covered here, please contact your Zone/Category Manager.
- If you are unclear about your obligations under your licence/lease, we recommend seeking professional advice from an appropriately qualified person.

Where to find more

- More comprehensive information: [www.bvgindia.com/isbt-kumedi/property — placeholder].
- Your Zone/Category Manager can provide further help and advice.
- BVG will also send periodic email updates to ISBT Kumedi occupants as procedures evolve.

Emergency number and procedures

Emergencies

Call [Control Room — Placeholder] immediately if life is at risk,
or use India's national emergency number 112 (mobile/landline).

Other national emergency numbers

- Police: 100 | Fire: 101 | Ambulance: 108 | Unified emergency: 112

Reporting safety or security matters

- (dangerous situations, accidents, unattended items, security concerns)
- [Placeholder internal extension] internal, or [Placeholder mobile number] external/mobile.

Raising a fire alarm

1. Shout 'FIRE'
 2. Activate the nearest fire-alarm call point
 3. Call [Control Room — Placeholder] or lift the nearest help point.
- State 'FIRE', the location, and any other relevant information.

If it's safe

- Stay visible so you can pass information to the Response Team.
- Fight the fire with the appropriate extinguisher only if confident and you have a clear escape route.

Evacuations

How evacuation zoning works

- The terminal building is split into zones — areas independently monitored and controlled — so an incident in one area doesn't require evacuating the entire building except in exceptional circumstances.
- During an evacuation you have a duty of care to move everyone in your area to a place of safety.
- The Response Team will confirm when you can return to your area.

What happens during an evacuation?

- The public announcement system will broadcast a message across the affected zone, instructing occupants to move to an adjacent safe zone or evacuate by the nearest available exit.
- If you're in the affected zone, it's your job to move passengers and colleagues safely to the instructed location. Take special care with disabilities or mobility needs.
- For more detail, refer to your employer's induction or speak to your line manager.

Reporting faults, unattended items, spills & pests

Reporting unattended items / lost property

1. Don't touch it
2. Try to find out who owns the item — discreetly ask nearby people
3. Call the terminal control point on [Placeholder number]

Reporting of faults

- Everyone can, and should, report faults — a broken lift, a jammed door, lights needing replacement.
- Call BVG Engineering Help Desk on [Placeholder number] / [placeholder]@bvgindia.com.
- Note down the fault reference number given — tracing a fault without it isn't possible.

Who cleans the spills?

- You are responsible for cleaning your own work area and any remote storage.
- Cleaning of public terminal areas (seating, walkways) is BVG's responsibility, though our team may not always be first to discover a spillage.
- If you find a spillage in a public area: make it safe, put out a wet-floor sign, and report it to BVG Engineering on [Placeholder number].

Pests

- Pest control within your own demised unit should be reported to your own pest contractor.
- Pest control in non-tenanted / common areas can be requested through the BVG Engineering help desk.

02

Your premises

Address, keys, cleaning & deliveries

Address and postcode

- ISBT Kumedi
- AB Road / Indore Bypass, Kumedi
- Indore, Madhya Pradesh
- PIN: [Placeholder]
- If you need a unit-specific address confirmed, contact your Zone/Category Manager.

Keys

- All accommodation is supplied and fitted with standard locks, keys or digipads.
- If you require a lock changed, contact your Zone/Category Manager — they will provide approved contractor details. A small contractor charge may apply.

Cleaning

- Your company is responsible for cleaning all internal areas of your unit, including windows/shopfronts.
- BVG's Property team maintains a list of approved cleaning companies for the terminal.
- For cleaning issues in common areas, contact BVG Engineering on [Placeholder number].

Deliveries & sustainability

- Deliveries (furniture, fixtures, stock): contact [Placeholder logistics partner] on [Placeholder number].
- BVG encourages all occupants to reduce energy and water consumption through efficient fittings and best operational practice.

Reporting faults within your premises

Whose responsibility?

- Your particular licence/lease agreement lists who is responsible if a fault occurs. Generally, BVG is responsible for repairing faults to the building structure, service media to your accommodation, and common parts.
- You will be provided with an asset responsibilities matrix clarifying whose responsibility it is to maintain which items (see Appendix A).

Reporting a fault that is BVG's responsibility

- 1. Contact the faults helpline: [Placeholder number] / [placeholder]@bvgindia.com
- 2. Provide as much information as possible — zone, level, unit number, and a clear description (e.g. 'broken door closure, Ground Floor, Shop-14').
- 3. Keep a log of the fault reference number given. Tracing a fault without this number isn't possible and will need to be re-reported, causing delay.

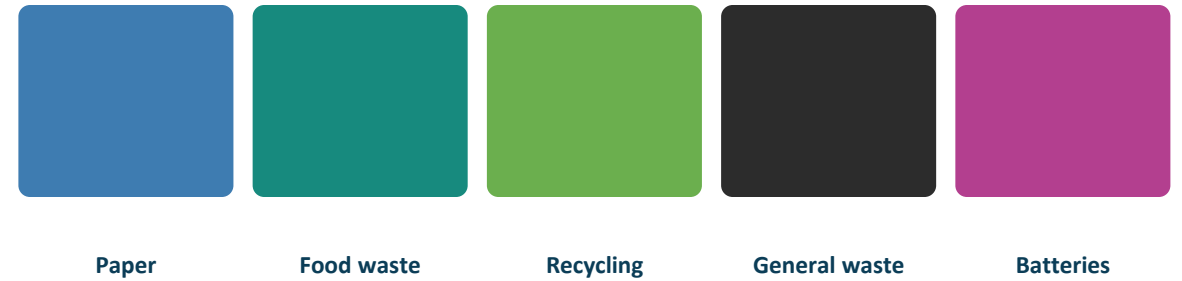

Waste management

It's every occupant's responsibility

- Ensure your waste is deposited in the nearest collection area — internal bin room or external bin/compactor area.
- Know where your nearest collection points are (see waste map, next page).
- Categories: General waste, Mixed recycling, Cardboard, Food waste, Glass.

Our goal: reduce, reuse, recycle

We can reduce waste costs by minimising waste, reusing what we can, and recycling rather than disposing of the remainder. Support our effort by putting your waste in the right bin.

Notes

- Large items of cardboard: please flatten and stack safely for collection.
- If you need any further information on waste, recycling and refuse, contact your Zone/Category Manager or BVG Engineering.

Waste / bin room map — Ground Floor

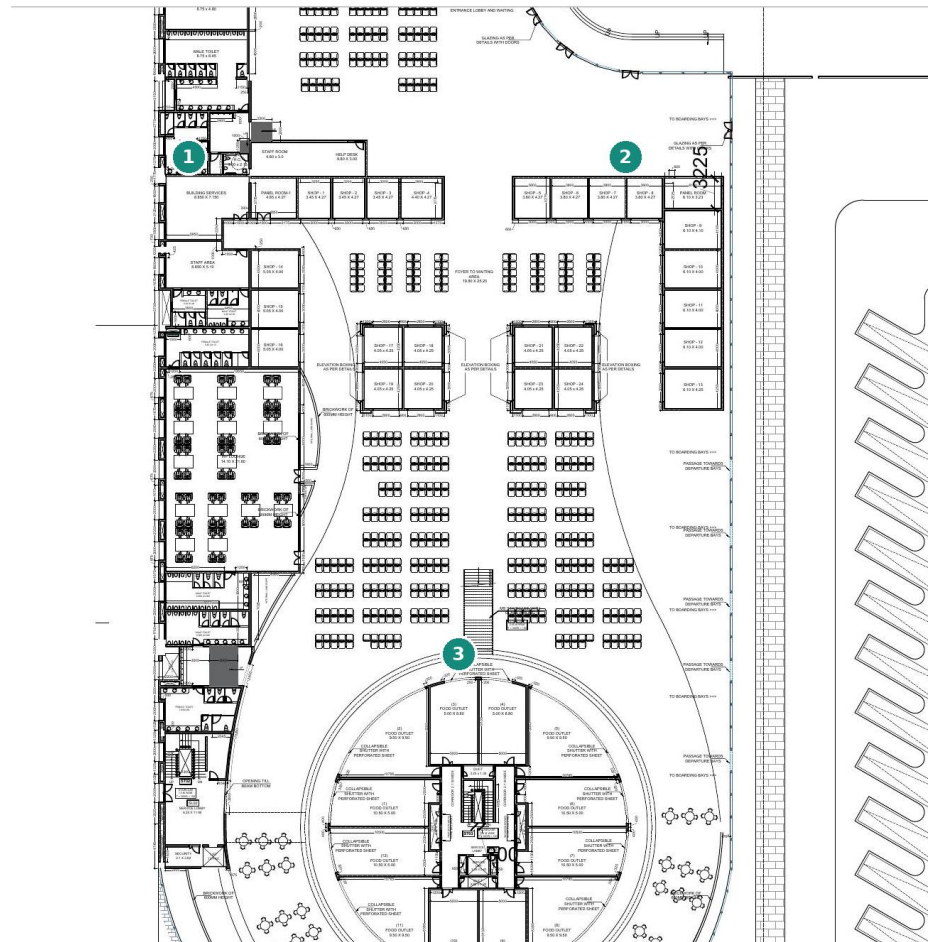

Reference points

- 1. Landside bin room (near Medical/Police/Cloak Room cluster)
- 2. Airside bin room (near Shop-9 / Panel Room)
- 3. Food Court back-of-house bin room

Ground Floor — Waste / Bin Room Reference Points

ISBT Kumedi | Illustrative numbering — final locations confirmed via BVG Waste Management Plan

ILLUSTRATIVE ONLY — pending confirmation by BVG Engineering / Fire Risk Assessment before use in a live emergency.

Requesting IT and telecom services

BVG Commercial IT & Telecoms

- BVG offers an end-to-end telecommunications service across ISBT Kumedi. When you connect to our services, your business benefits from onsite support, a terminal-based Network Operations Centre, and a dedicated Commercial Telecoms Account Manager.
- Mention 'Property Handbook' when placing your order to receive installation support.
- Contact: [Placeholder Name], [placeholder]@bvgindia.com, or visit [www.bvgindia.com/isbt-kumedi/telecoms — placeholder].

Summary of products & services

- Broadband — connect your own equipment or use BVG's managed service
- Wireless LAN — secure coverage across operational areas
- Telephony — IP and analogue lines for inbound/outbound calls
- CCTV — dedicated or shared, on BVG's managed network
- Digital signage / FIDS-style displays — real-time departure information on standard display units
- Wide-area mobile data — coverage for outdoor / boarding-bay areas

Altering your accommodation & inspections

Altering your accommodation

- Under the terms of your licence/lease, you must inform BVG of any changes you are planning to your accommodation — formal approval may be required.
- A dedicated Property Approvals team can help you through this process. Contact: [Placeholder Name], [Placeholder number], [placeholder]@bvgindia.com.
- A fit-out guidelines document is available at [www.bvgindia.com/isbt-kumedi/fitout — placeholder], or via your Zone/Category Manager.

Inspections of the workplace

- The Occupier must carry out periodic inspections of their workplace, recorded, with any actions remedied in a timely manner.
- Pay particular attention to: fire, electrical, dangerous substances, slips and trips, access/egress, unsafe machinery, toilet/cooking hygiene, kitchen extracts, housekeeping, and workplace environment (lighting, temperature, ventilation, noise).
- All property areas will be inspected annually by BVG Property or an audit contractor — see Appendix B for audit scope.

Health & safety responsibilities and contingency planning

Health and safety responsibilities

- Your property agreement contains information on the responsible person.
- Where responsibilities overlap or there is disagreement over the lease, all parties must cooperate to resolve health and safety issues, consistent with applicable Indian workplace safety regulation.

Contingency planning

- Contingency planning helps you keep trading safely and profitably after an incident that temporarily disrupts your operations.
- We recommend preparing instructions/contingency plans for losing or partially losing access to your accommodation.
- Employers must provide out-of-hours contact details to the Terminal Control Centre. If you cannot occupy your accommodation due to an incident, BVG will try to provide similar accommodation where possible.
- It is an occupant's responsibility to ensure critical systems are backed up with an alternative power source.

Electrical safety

Standards and inspection

- All areas are supplied with an electrical supply, normally 230V/415V AC unless otherwise stated.
- Circuits and protective devices are designed to meet applicable Indian electrical safety standards.
- The electrical supply is inspected and tested at regular intervals by BVG Engineering.
- Overloaded circuits damage the installation and are a fire risk. Damaged equipment must be taken out of service until repaired or replaced.

Item	Restriction	Action
Specialised equipment (e.g. battery chargers)	Needs additional control measures (e.g. local exhaust ventilation), installed by specialist engineers.	Contact your Zone/Category Manager for installation & approval info.
Electrical cooking appliances	Limited by the type of accommodation you have.	Contact your Zone/Category Manager for guidance.
Multiple plug outlets	Must not be left lying on the floor (fire hazard); should be affixed to a wall or desk.	Report electrical faults immediately to the designated helpdesk.

PAT testing, risk assessment & accident reporting

PAT testing

- All occupants under the terms of their licence/lease must comply with BVG standards for electrical appliance safety.
- Portable Appliance Testing (PAT) is the chosen standard; an alternative method may be accepted if equally effective and documented.

Risk assessment

- All employers must identify, assess and record, in writing, all significant risks to employees and others before work begins.
- Make the risk assessment available to affected employees, and review it whenever working practice changes, or at least every 3 years.

Accident reporting

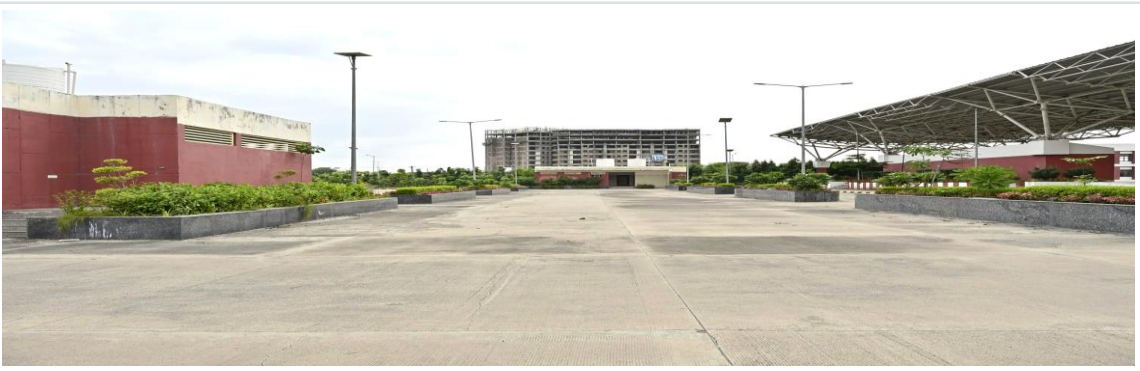

- Reportable injuries, diseases and dangerous occurrences must be reported to the relevant enforcing authority, consistent with applicable Indian statutory requirements.
- Any incident of property damage or personal injury occurring in BVG-managed premises must be reported by the occupier to their Zone/Category Manager at the earliest opportunity.

Know your ID passes

Rules on the wearing of ID passes

- Pass-holders must display their ID passes at all times on a BVG-approved lanyard or arm band while on terminal premises.
- If a pass-holder refuses to be searched, access to security-restricted areas will not be given.
- If your details change, inform the ID Centre. If you lose your pass, report it to [Placeholder ID Centre contact] and, out of hours, contact terminal control on [Placeholder number].
- Misuse of an ID pass will result in its withdrawal.
- Remove your ID pass while travelling to and from work, and challenge anyone not wearing an ID pass in a staff-only area.

Pass colour	Access
Blue	Internal + external security-restricted areas
Green	All internal security-restricted areas
Purple	Landside access only
Yellow	All other airside-equivalent (boarding bay) areas
Temporary	Time-bound, escort may be required

Terminal entrance and access control point

Your journey to ISBT Kumedi & colleague restaurants

Getting to and from work

- ISBT Kumedi is served by AICTSL city bus routes and MP State Transport services, with connectivity into Indore's wider public transport network.
- [Placeholder: details of any staff shuttle, discounted travel scheme, or cycle/two-wheeler parking arrangement, once finalised.]

Colleague restaurants

- Colleague dining facilities are located within the terminal's Ground Floor food court zone and staff amenity area.
- [Placeholder: opening hours and exact location once operator is finalised.]

Terminal approach road and forecourt

Smoking and vaping areas — BVG colleague use only

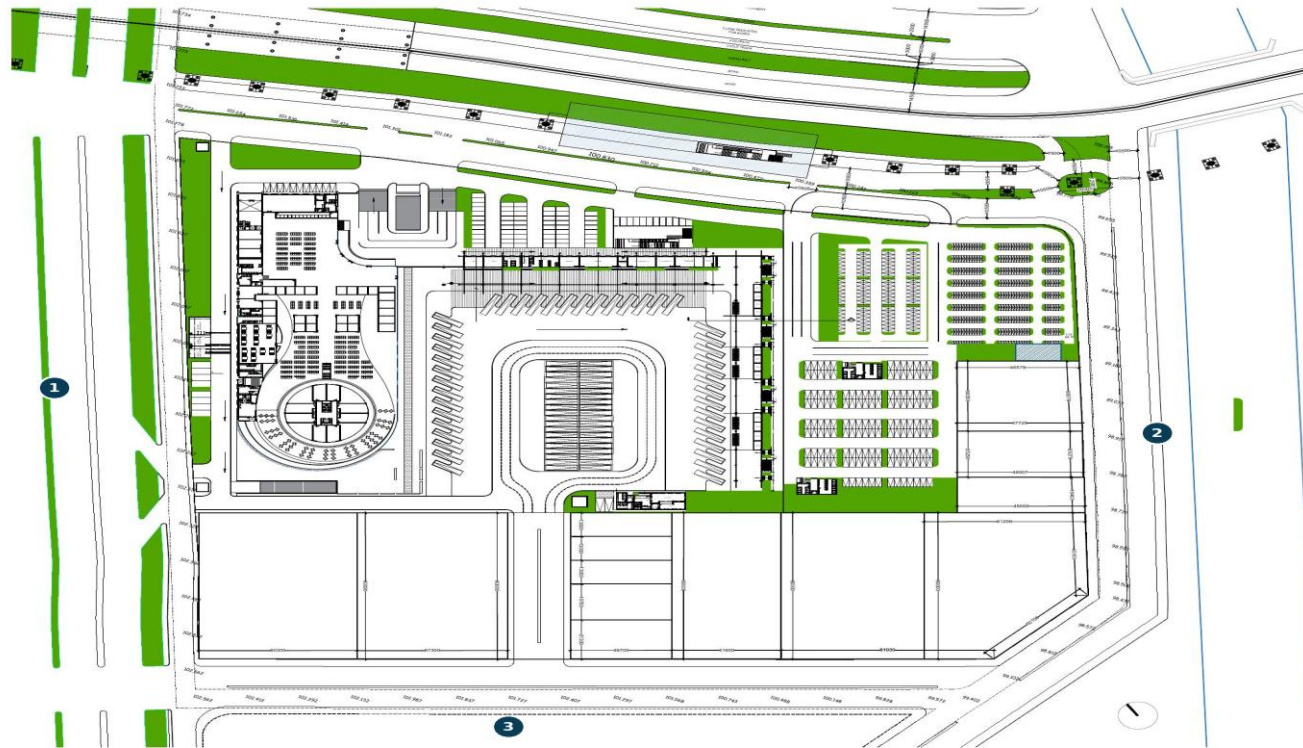

Points

- 1. Perimeter, west green belt
- 2. Perimeter, east service road
- 3. Perimeter, south boundary

Site Plan — Designated Smoking / Vaping Points

ISBT Kumedi | Illustrative — perimeter, away from terminal building; final points confirmed by BVG EHS

Fire protection

Colleague fire training	29
Fire safety	29
Fire risk assessment	30
Fire assembly points	31
Run, Hide, Tell	32
Fire protection	33
Preventing accidental fire alarm activations	33

Colleague fire training & fire safety

Colleague fire training

Once you have moved into your accommodation, all your colleagues must receive fire training by a competent person within 1 month of your move-in date.

It is your responsibility to ensure colleagues receive the required training and that a fire risk assessment of your premises is carried out.

Annual training must cover

- Action on discovery of a fire; action upon hearing the alarm
- Location and operation of fire alarm call points
- Means of fighting a fire; method of calling the fire brigade
- Means of escape and roll call procedure; location/use of fire doors
- Evacuation and assembly points; visitor procedures; written emergency procedures

Fire safety — new starters & records

- All newly employed colleagues (including casual staff and contractors) must be given a fire and safety brief on their first day, and must attend an approved fire training course within 30 days of starting.
- BVG will ask you to confirm annually that all colleagues received training. Your Zone/Category Manager may ask for sight of your Fire Training and Log Book.
- A 'Train the Trainer' facilitator course is available so a member of your team can train colleagues directly — contact [Placeholder Fire Safety Manager], [Placeholder number].
- Fire training can also be arranged through an external provider — [Placeholder provider], [Placeholder contact]. A cost may apply.

Fire extinguisher point, mezzanine level (as installed)

Fire risk assessment

Responsibility and process

- The primary responsibility for workplace fire safety sits with employers and those in control of the workplace, consistent with applicable Indian fire safety regulation and the National Building Code fire provisions.
- A risk assessment is mandatory and must be carried out by a person trained and competent to conduct Fire Risk Assessments.

The Fire Risk Assessment must

- Identify potential fire hazards
- Decide who may be affected
- Evaluate the risks and decide whether existing control measures are adequate — and if not, what's required
- Record all findings and notify all relevant parties
- Keep the assessment under review
- External providers can assist — contact [Placeholder provider], [Placeholder number]. A cost may apply.

Fire assembly points — Ground Floor

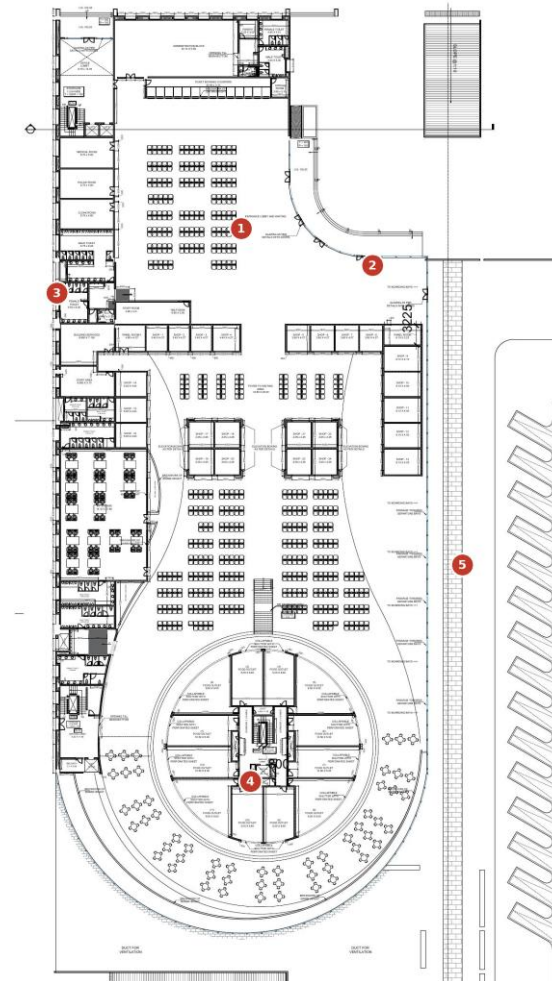

Reference points

- 1. Entrance lobby forecourt
- 2. Boarding-bay passage exit
- 3. Landside staff exit (Medical/Police cluster)
- 4. Food Court central exit
- 5. Boarding bay perimeter, east side

Ground Floor — Fire Assembly / Muster Reference Points

ISBT Kumedi | Illustrative numbering — final points confirmed via site Fire Risk Assessment

ILLUSTRATIVE ONLY — pending confirmation by BVG Engineering / Fire Risk Assessment before use in a live emergency.

Fire assembly points — First Floor

Reference points

- 6. Office corridor stair core (north)
- 7. Office corridor stair core (south)
- 8. Connecting bridge stair core

Important

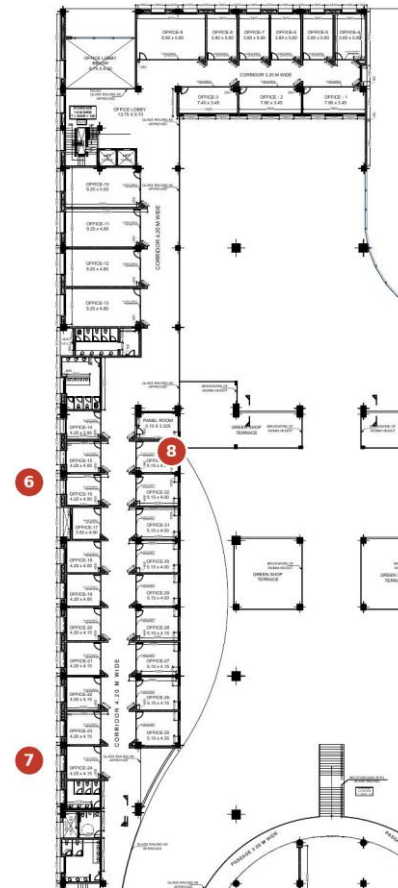

A fire-alarm call point may not sound the alarm immediately — a red light confirms activation.

It registers at terminal control, which dispatches the Fire Brigade / Response Team.

First Floor — Fire Assembly / Muster Reference Points

ISBT Kumedi | Illustrative numbering — final points confirmed via site Fire Risk Assessment

ILLUSTRATIVE ONLY — pending confirmation by BVG Engineering / Fire Risk Assessment

If an armed attack or active-threat situation happens, follow national counter-terrorism guidance:

RUN HIDE TELL

RUN

Run to a place of safety. If there's nowhere to go, then...

HIDE

Turn your phone or radio to silent and disable vibrate. Barricade yourself in if you can.

TELL

Call the terminal control point on [Placeholder] from a landline, [Placeholder] from your mobile, or the police on 100 / 112.

Save the terminal emergency number to your mobile phone now: [Placeholder]

Fire protection & preventing accidental alarms

Fire protection

- BVG will implement technical and management initiatives, in conjunction with capital investment in fire safety, to reduce false-alarm fire calls over time.
- Given the size, complexity and number of fire alarm devices across a live transit terminal, minimising false alarms is an ongoing focus area — targets to be set once baseline data is available. [Placeholder: baseline figures.]

Why it matters

- Fire and Rescue services respond to every fire call. Over 90% of fire alarm activations nationally tend to be false alarms — avoidable activations are costly through lost time, evacuation disruption, and potential business/passenger impact.
- All fire alarm activations at a facility like ISBT Kumedi are, in principle, avoidable — many are linked to inappropriate positioning or use of kettles, microwaves and toasters.

Reducing accidental activations

- Toasters and microwaves should comply with applicable safety standards (e.g. BIS-equivalent to BS EN 60335-2-48).
- Appliances used in the work area must be supplied by the employer and approved — not brought in without company approval.
- Portable appliances are subject to periodic PAT-equivalent testing; an untested appliance should not be used.
- Appliances must be positioned on the work surface, not stacked on top of one another, and ventilation grills must not be blocked.
- Kettles and toasters must be attended for the duration of cooking; microwave ovens must be in view throughout.
- Avoid electric kettles where an appropriate water boiler can be installed instead.
- Cooking equipment must be located within food preparation/kitchen areas only — any change of location needs sign-off from the Terminal Maintenance Compliance Manager and an updated Fire Risk Assessment.

Fault reporting

ISBT Kumedi, Indore
Property Customer Handbook

Fault reporting overview	37
Fault reporting flow	38
Fault responsibility matrix — Bus Bay / Retail unit	39
Fault responsibility matrix — Amenities / Parking	40

Fault reporting — overview

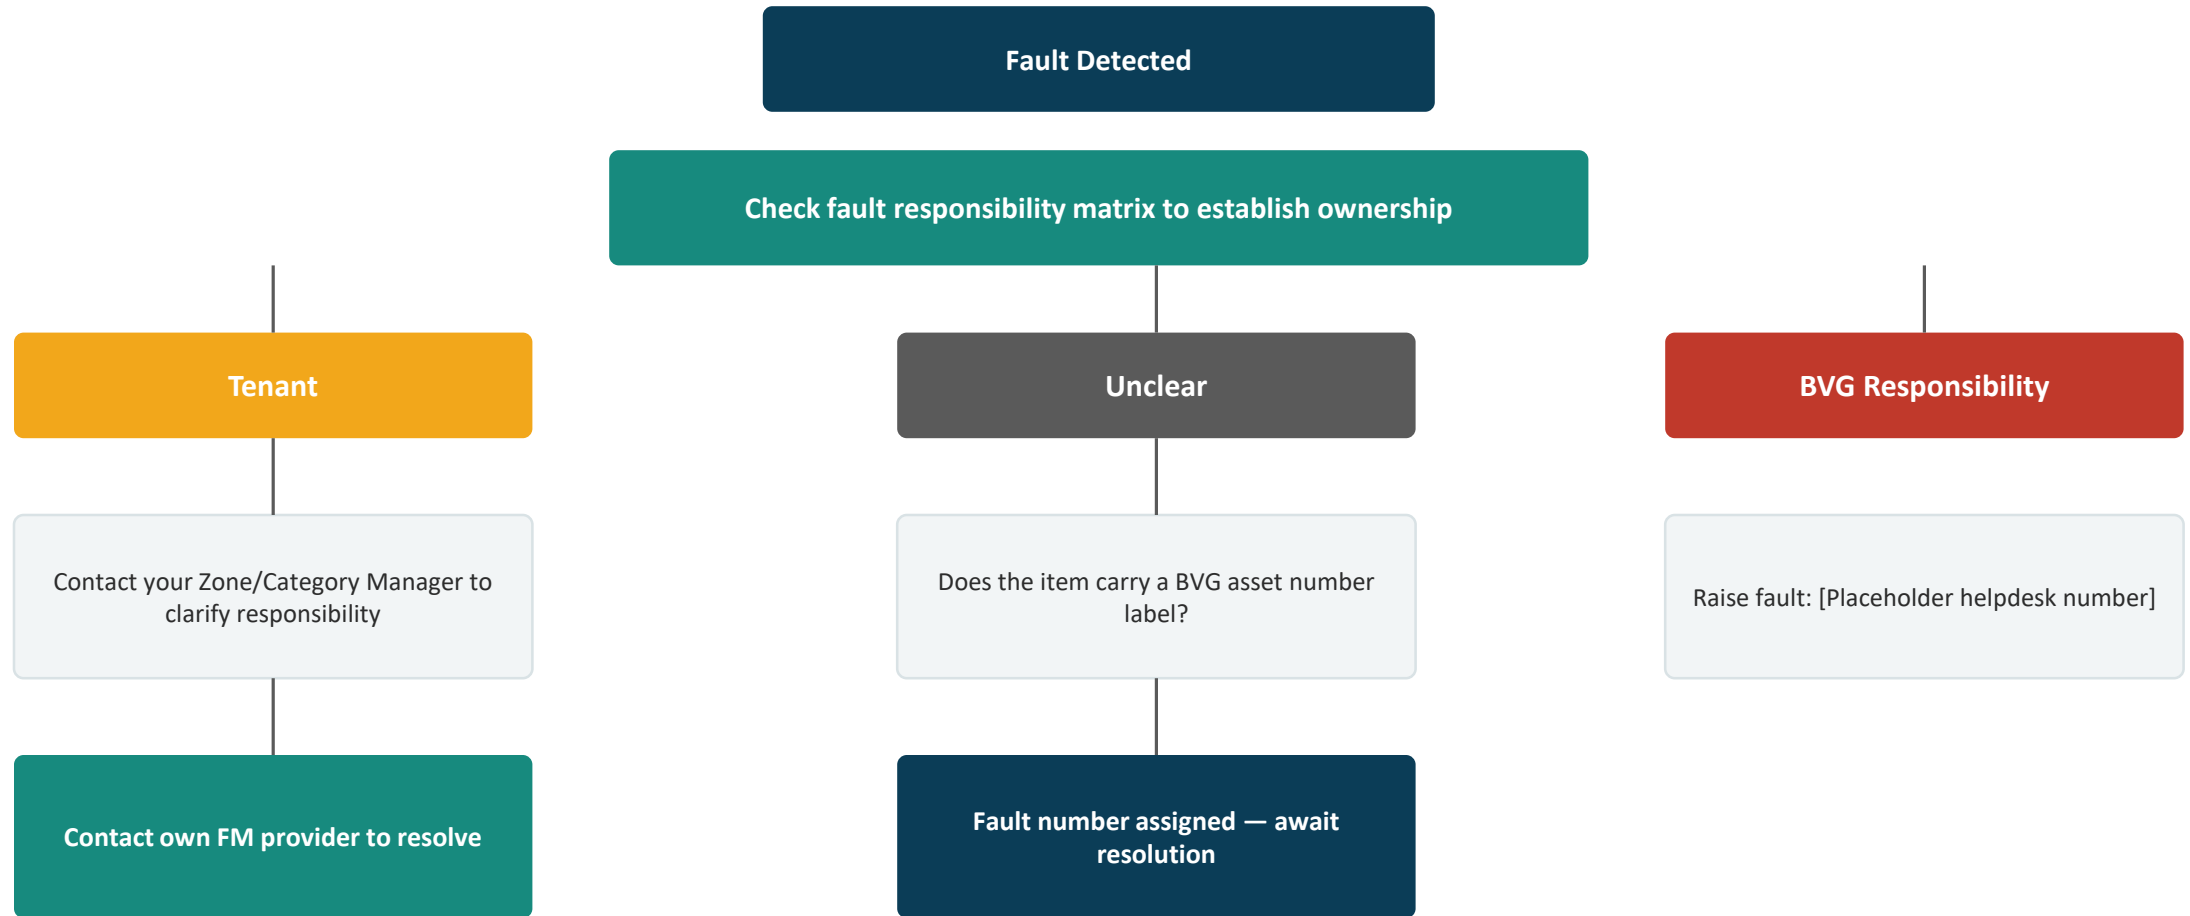

General guide

- This is a general guide to responsibilities when a fault occurs, across the three main types of ISBT Kumedi accommodation:
- Bus bay operations and boarding-side back offices
- Retail, F&B and food court units held on standard licences
- Institutional / office accommodation (First Floor)
- There may be variances where you have installed your own bespoke fit-out items.

Before you report

- You must check whether the equipment is your responsibility before reporting it to BVG as a fault.
- Provide the information set out on page 11 (fault description, location, unit number), and keep a record of the fault number as advised on page 11.

Fault reporting flow

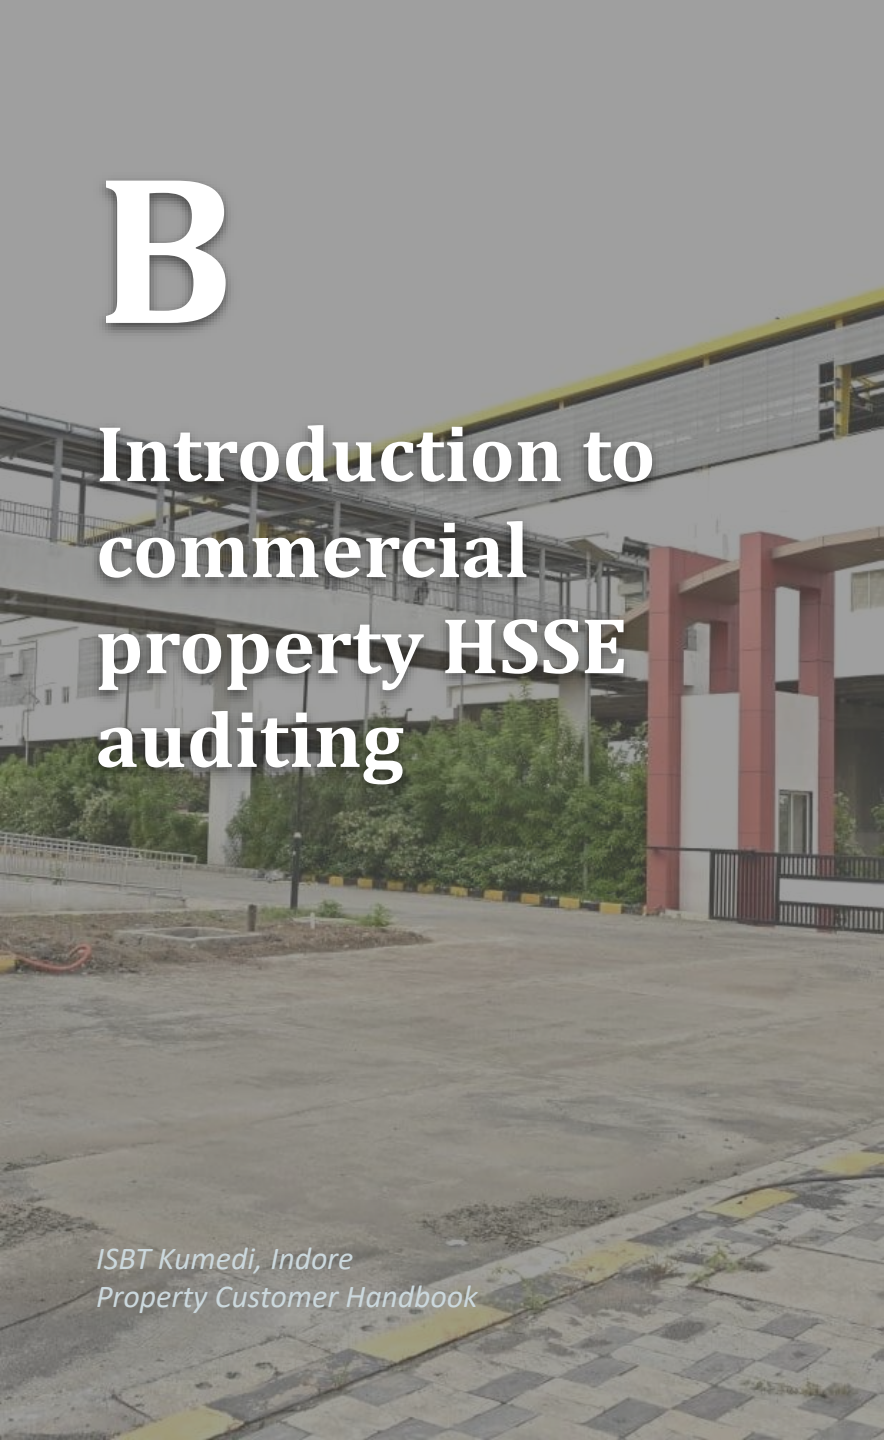

Fault responsibility matrix — Bus Bay & Retail units

Item	Responsibility
Heating, ventilation & air conditioning (HVAC)	BVG
Small power within the demise (sockets, wiring)	BVG
Lighting — consumables (tube/bulb replacement)	BVG
Lighting — including illumination of signs	BVG
Structural maintenance — locks, flooring, ceiling grid, walls, doors (excl. damage by misuse)	BVG
Decoration of back offices	Occupant
Furniture in back offices / units	Occupant
Cleaning	Occupant
Safes (installation subject to approval)	Occupant
Telephone / external network systems	BVG

Fault responsibility matrix — Amenities & Parking

Item	Responsibility
Fire alarm system, sprinklers, PAVA speakers	BVG
Potable water supply to main isolation valve	BVG
Potable water supply within the demise	Occupant
Drainage — foul drainage within the demise	Occupant
Collecting/disposing of rubbish and providing suitable bins	BVG
Parking barrier systems, signage, lighting	BVG
All furniture, fittings, microwaves, fridges etc.	Occupant
Fire extinguishers	Occupant
CCTV within the premises	Occupant
Cleaning and pest control within the demise	Occupant

*ISBT Kumedi, Indore
Property Customer Handbook*

BVG India Limited — ISBT Kumedi

AB Road / Indore Bypass, Kumedi, Indore, Madhya Pradesh | T: [Placeholder] | W: [bvgindia.com](#) [placeholder]

Dear Occupier,

BVG Commercial Property Safety Compliance Inspection — PLEASE READ

BVG Property has partnered with [Placeholder auditing partner] to deliver our annual safety compliance inspections across all ISBT Kumedi commercial units.

The delivery of this inspection programme is integral to ensuring that legal duties toward fire safety and health and safety within BVG-managed premises are met and maintained. It is therefore essential that you engage and cooperate fully with [Placeholder auditing partner] within this process.

[Placeholder auditing partner] is authorised to contact you with a date for your compliance inspection. We expect a response within 5 working days of that date being announced.

During the inspection, a representative of your business must be present to accompany the inspector — someone able to provide adequate knowledge of the safety management controls and policies you have in place.

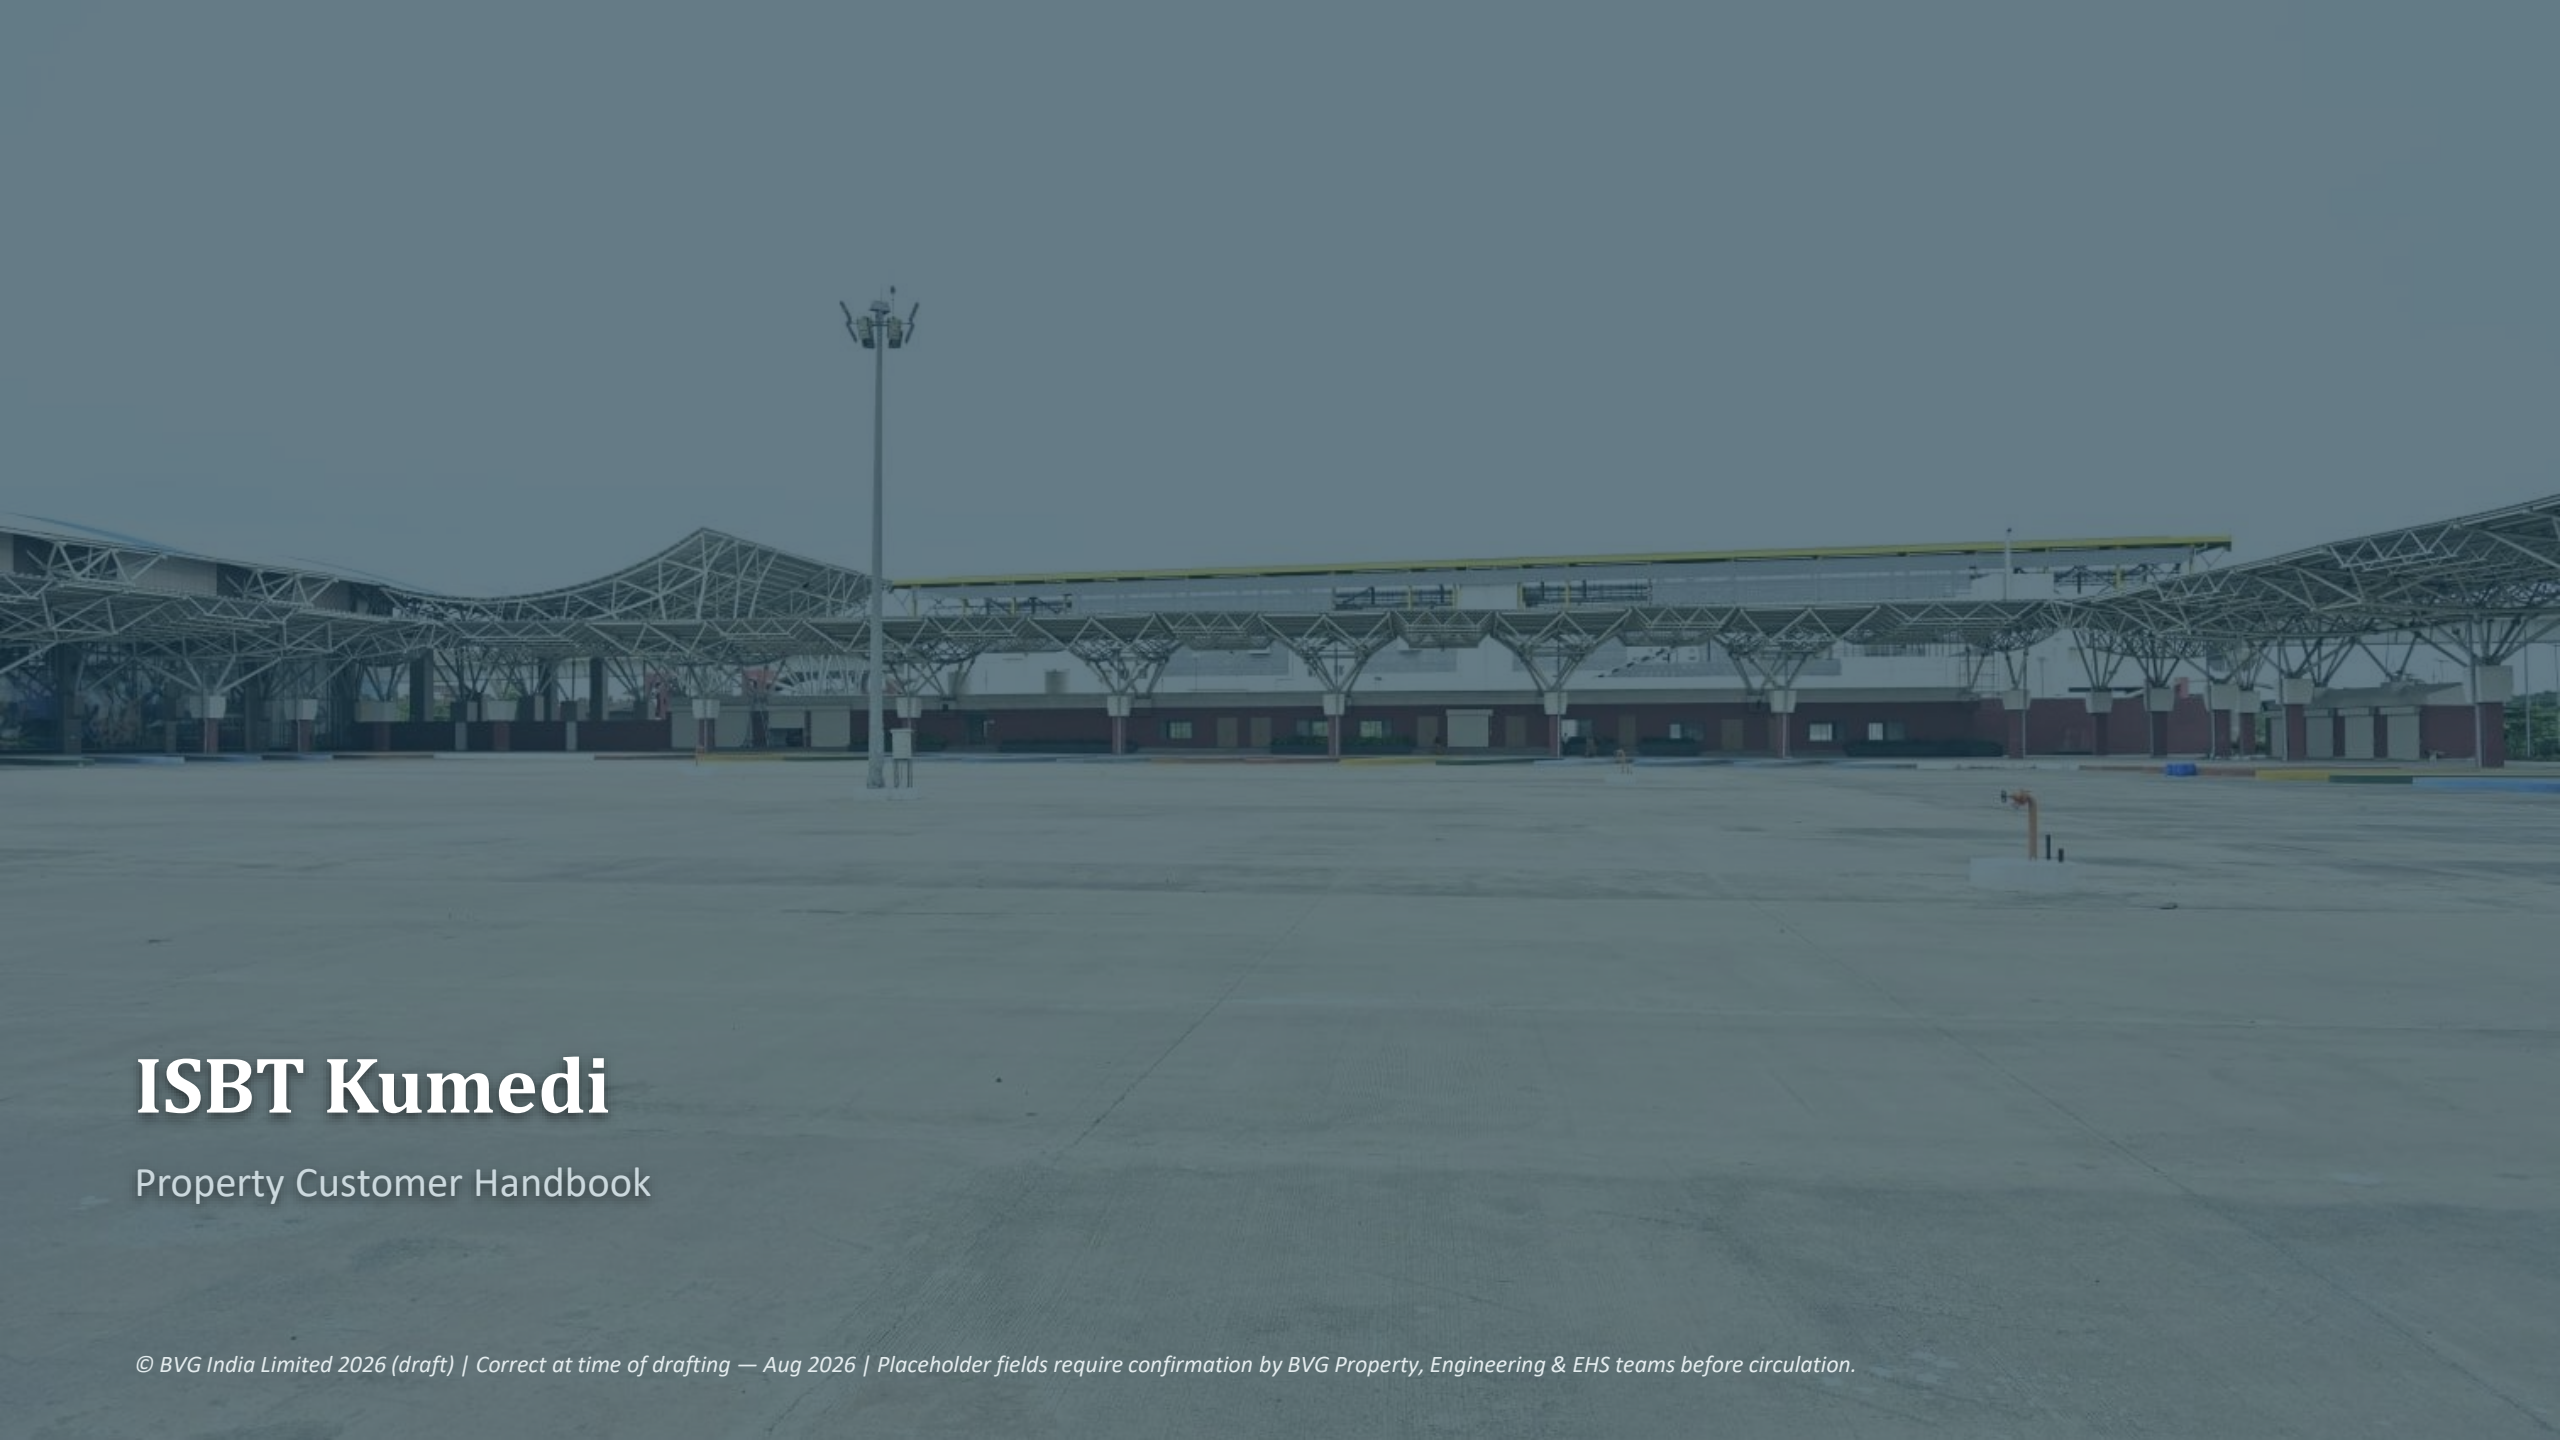

You will be required to have the following documentation available for inspection:

- Copy of your Fire Evacuation Plan for staff
- Current Fire Risk Assessment for your premises
- Fire extinguisher test certificates
- Water quality sampling documentation (where applicable)
- Emergency lighting inspection/testing records (where installed as part of your fit-out)

Thank you in advance for your cooperation and support. If you have any further questions, please contact your Zone/Category Manager.

With regards,
